**Airplane mode on.**

# Fragments and Transitions

Add **Fragment** components and assign step indexes to reveal content at the right moment.

# Fragments and Transitions

Add **Fragment** components and assign step indexes to reveal content at the right moment.

## STEP 1

### **Reveal fragments**

Fragments stay hidden  
until their step.

# Fragments and Transitions

Add **Fragment** components and assign step indexes to reveal content at the right moment.

## STEP 1

### **Reveal fragments**

Fragments stay hidden  
until their step.

## STEP 2

### **Choose motion**

Transitions are typed  
props.

# Fragments and Transitions

Add `Fragment` components and assign step indexes to reveal content at the right moment.

## STEP 1

### **Reveal fragments**

Fragments stay hidden  
until their step.

## STEP 2

### **Choose motion**

Transitions are typed  
props.

## STEP 3

### **Keep markup simple**

Plain Tailwind classes work  
as expected.
